

VIPP492

Sculpture Lamp

PRODUCT DESCRIPTION

The Vipp Sculpture table lamp is ideal as decorative lighting, suitable for the living room or bedroom. A durable LED unit is hidden under a three-layer opal glass shade, offering a cosy illumination. The round cylinder base of either grey or white marble features a dimmer switch and a fabric covered cord.

Sculpture Lamp

KEY SELLING POINTS

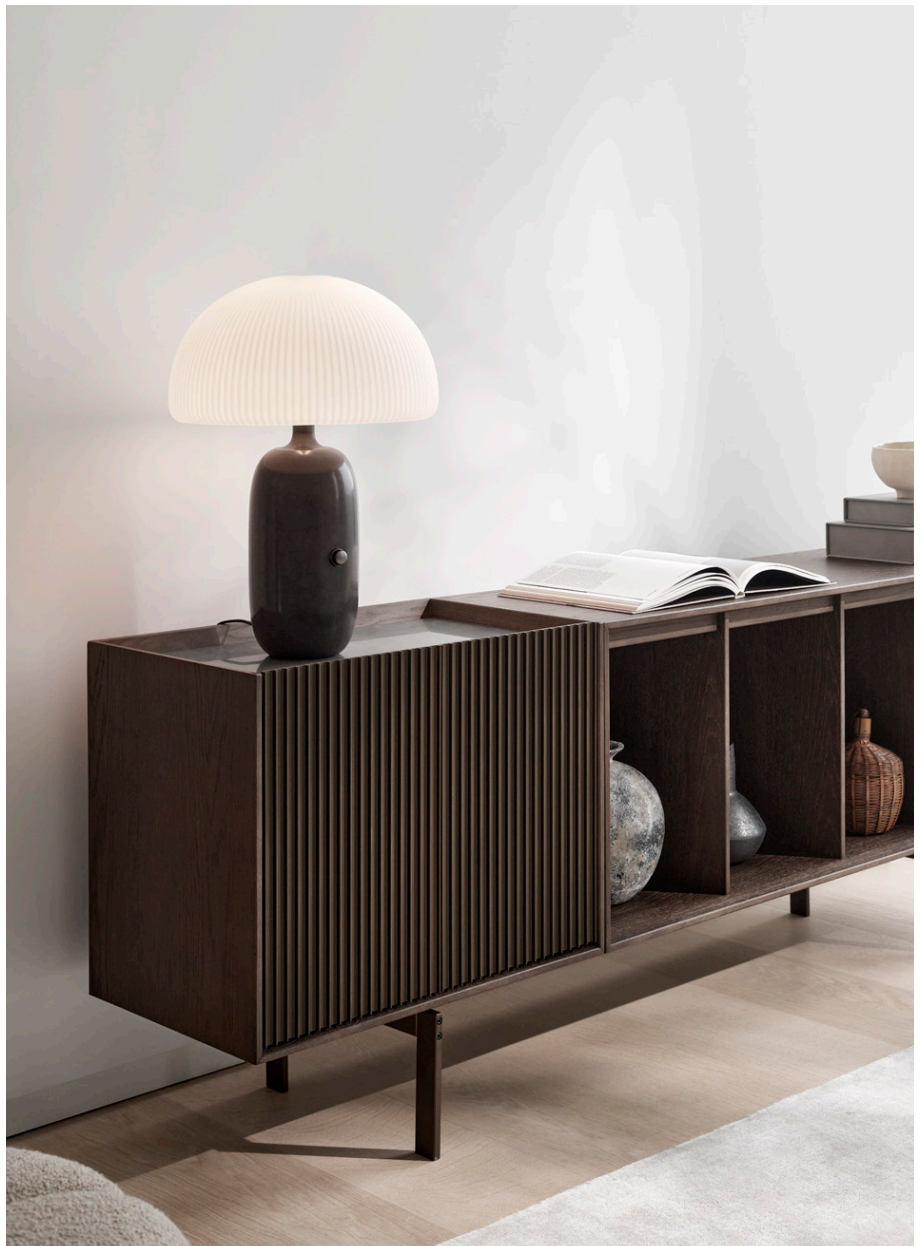

Ancient mouth blowing techniques have been used to shape the lampshade of layered glass.

The refined composition of inner white glass layers and outer frosted layers generates the opaque surface and ensures a uniform and cosy distribution of light.

A metallic dimmer switch of grooved aluminium lets you to set the mood according to specific surroundings. Although the Sculpture lamp is ideal for cosy illumination, the integrated dimmer function allows for flexible light intensity.

The opal lampshade is internally lit by a custom-made LED light source. This LED unit contains 50.000 light hours, making it a long-lasting alternative to traditional light sources.

An interplay of honed, natural marble, mouth-blown glass and durable aluminium details mimics the aesthetics of a handmade sculptural object, where an unexpected composition of materials is met and not two pieces are alike.

& DETAILED DESCRIPTION

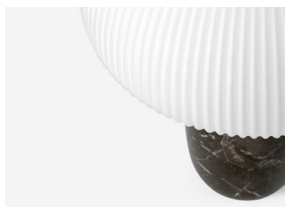

VIPP492
Sculpture Lamp

PRODUCT MATERIALS
& SURFACE TREATMENT

Three-layer opal glass shade with an acid treated finish creating a matte toned glass shade. Grey or white marble in honed finish and color enhancement treatment. Metal parts has all been treated with gun metal finish.

Fabric covered cord with a power unit with changeable plug.

PRODUCT CHARACTERISTICS
& MAINTENANCE

Characteristics

Three-layer opal glass shade that creates a fully diffused area with uniform illumination.

Grey marble

The round cylinder base of grey marble is defined by most dark grey/black stone with white stripes (veins) and "dust/sprinkle" is common. The stone can have white clouds and black shades but should have an overall homogeneous surface. Depending on the density it can have some cracks which should be filled with epoxy to strengthen it.

Finish

Honed (matte), sealed with Natural impregnation slightly enhancing the color yet leaving a matte protected surface.

White marble

The white stone has a lot of details. White veins and "dust/sprinkle" are common. The stone has shades of grey varying from almost white to light grey. "Impurities" are often seen which gives the stone a nice play of colors.

It also has a yellowish hint from natural iron (rust) content giving visual warmth to the look.

Finish

Honed (matte), sealed with Natural impregnation slightly enhancing the color yet leaving a matte protected surface

PRODUCT CERTIFICATIONS

The Vipp Sculpture lamps are constructed and safety-tested according to the IEC/EN 60598-2-4 & IEC/EN 62031.

The CE marking is the manufacturer's declaration that the product meets the requirements of the applicable European directives and ensures

that the product may be legally placed on the European market.

Vipp luminaire products are designed with respect to the Low Voltage Directive (LVD) 2014/35/EU.

AVAILABILITY

The lamp is available for EU and UK markets. US and far markets are currently not available.
